

Resource Wrap: 22 April 2010

Aquila Resources Limited (AQA) said the Minister for Climate Change and Sustainability has approved the conditions for a new Environmental Approval to allow increased production at the Isaac Plains Coal Mine in Central Queensland. The company said production at Isaac Plains would now increase from 2 million tonnes per annum (Mtpa) to the target of 3.6 Mtpa of run of mine coal production. Aquila said the expansion would also involve the construction and operation of the mine's recently refurbished dragline.
